

Alternative Hair Foundation II (CR102)

Alternative Hair Foundation II workshop uses the alternative hair building blocks explored in the Foundation I workshop (or equivalent experience) to increase our knowledge base to include advanced concepts, design methodology and application for the full enhancement.

Understanding the head anatomy and its' components (*skull, muscles and skin*) are most critical for successful and intentional design, fit, comfort and natural appearance of a full enhancement. *Design Elements* are further explored ~ each offering equal contribution to design methodology. *Methods of Measure* are reviewed including selecting the proper measuring tool, usage and strategies. Sherri Renée *Full preDesigns (7)* are discussed ~ including design specification, usage and ordering procedures. *Preparation, fitting and finishing* are stressed as they contribute to the successful deliverence of a full enhancement.

Education is provided through visual presentations, demos, hands-on practicals, and sharing. Topics include:

- Head Anatomy (Skull, Muscles, Skin)
- Design Elements
- Methods for Measure
- Full Design Specifications and Usage
- Design Principles / Ordering
- Preparation
- Fitting, Editing & Alterations
- The Art of the Finish
