 Density | Medium
 Curl /Wave Pattern | 30MM Natural Body
 3D Color Modeling | Chiaroscuro

CHIAROSCURO COLOUR™ STOCK COLLECTION

The **Chiaroscuro Colour™ Collection**, by Sherri Renée, reveals hair's organic nature and inherent beauty ~ inspiring unlimited possibility for reflective-color expression, enhanced tonal nuances, and the personalization we seek from alternative hair couture.

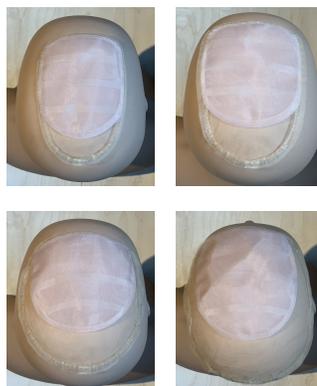

Chiaroscuro - the visual discipline of using thematic hues (colors) and graduated values (light and shadow) - is observed from nature and adapted for our collection to achieve a more profound sense of realism, tonal unity, and color dimension.

Chiaroscuro 3D Color Modeling™ is applied to the hair's surface as if an imaginary light source (the sun) is gently shining around the face. Brighter color values (light) reside in the front, temple, and top - then naturally graduate to darker, less intense color values, traveling back towards the crown, sides, and nape (shadow). This analytical division of light and shadow mimics the three-dimensional volume and form necessary to impart realism to alternative hair.

Each design in our collection features our **Le Réalisme™ scalp replica** - a patent-pending french-injected top panel - where individual strands of hair are hand-injected into a thin, skin-like membrane custom tinted to match scalp color and tone. This proprietary technique eliminates "return hairs," thus revealing a smoother texture, consistent root-to-end density, and enhanced hair flow and movement - an excellent choice for more sleek, smoother hairstyles. We further covet our top panel with an under-layer of Parisian silk - soft, comfortable, and aesthetically pleasing.
